HOW TO USE

- The flight availability calendar presents you with the cheapest available price for your selected 'Hotel + Flight' holiday, based on duration, departure airport, resort and airline cabin.
- The calendar displays 7, 10 and 14-night duration options, depending on your clients preference.
- The cheapest available departure date is highlighted in green for that month.
- Search up to 9 months in advance.
- Ensure to go to the last checkout stage for final pricing – due to the calendar data being updated every 24 hours, pricing displayed is subject to availability, i.e. room category and cabin class.
